# CP RANGE CONVENTIONAL SOUNDERS, BEACONS & BELLS

Our CP RANGE of wall-mounting Electronic Sounders and Sounder/Beacons provide good audibility in all directions. They have locally controllable output levels allowing the sound intensity to be adjusted to suit the application. If required, the use of a third wire enables a second stage alarm to be switched to override the selected tone. These versatile features allow them to work seamlessly with most fire detection systems. All fully comply with EN54 and have a protection rating of IP65. Also available is a motorised bell.
